

**TO
MEMBERS OF EUROCHAMBRES**

Dear colleagues,

Since July 2020, the Bulgarian Chamber of Commerce and Industry (BCCI) has been participating in the implementation of the Horizon 2020-funded project VOJEXT (Value Of Joint EXperimentation in digital Technologies for manufacturing and construction).

The project aims to provide a favourable business and technological framework for cognitive autonomous systems supporting human-robot interaction. The so-called collaborative robots “cobots” will support the SMEs’ automation processes in important production sectors as plastics, electronics, automotive smart manufacturing and construction. Furthermore, the project will provide open calls opportunities for improvement of the SMEs’ R&D potential in the sphere of the robotics and closely related with the VOJEXT technological achievements. The open call for a cascade funding of SMEs will be launched in the beginning of 2022. More information will be available at the project’s website - <https://vojext.eu/>

BCCI is one of 20 partners participating in the implementation of the project, which foresees a wide range of initiatives, activities and events for innovative entrepreneurs, SMEs and mid-caps in technological sectors, such as cognitive robotics, Information and Communications Technology (ICT), Information Technology (IT), Artificial Intelligence (AI), etc.

As Dissemination & Communication Manager, BCCI believes that it would be worth sharing a brief information about VOJEXT project and VOJEXT site through your communication channels.

Any support on Your behalf will be highly appreciated.

Thank you in advance for your cooperation.

Yours sincerely,

**“European integration and projects” Directorate
Bulgarian Chamber of Commerce and Industry**
